I'm an AI engineer with a **Bachelor's and a Master's in Artificial Intelligence** from **Paris-Saclay University** in **Deep Learning, Computer Vision, NLP and Foundation Models**, seeking a full-time role from **October 2026**.

EDUCATION

MSc Computer Science, Artificial Intelligence. Sept 2025 – Sept 2026

Paris-Saclay University, *First French Research University in Mathematics and Artificial Intelligence*.

MSc Computer Science, Mathematics, Vision, Learning. Sept 2024 – Sept 2025

ENS Paris-Saclay, *First French Research University in Artificial Intelligence*.

Msc Computer Science, Artificial Intelligence. Sept 2023 – Sept 2024

ESIEE Institute of Technology.

BSc Computer Science, Applied Mathematics. Sept 2017 – Sept 2019

Sup 'Management Engineering School, *First Gabonese Research University in Mathematics*.

PROFESSIONAL EXPERIENCE

Machine Learning Engineer | Internship | Full-Time | Nokia Networks, France: April 2026 – Sept 2026

- Work on tasks in Deep Learning, Convolutional Neural Networks and Graph Neural Networks.
- Work on tasks in Self-Supervised Learning, Signal Processing and 5G/6G technologies.

Concepts: Python, PyTorch, TensorFlow, C++, Signal Processing, CUDA, Parallel Programming, 5G/6G

Deep Learning Researcher | Internship | Full-Time | SEGULA Technologies, France: April 2025 – Sept 2025

- Development of reduced-order models for multi-physics dynamical systems governed by nonlinear PDEs.
- Implementation and fine-tuning of Deep Learning architectures (Autoencoders, LSTM, GNN) for PDEs.

Concepts: Python, PyTorch, TensorFlow, LSTM, GNN, C++, Boost, Eigen, Parallel programming, CUDA.

Machine Learning Engineer | Fixed-Term Contract | Full-Time | Evolukid, France: Sept 2023 – Sept 2024

- Design of a real-time multi-modal chatbot for image interpretation and conversation analysis.
- Development of a multi-modal object detection system combining CNN diagram feature extraction and Transformer textual embeddings with attention mechanisms for inference.

Concepts: Python, PyTorch, TensorFlow, Transformers, C++, Text Processing, Image Processing.

Software Engineer | Fixed-Term Contract | Part-Time | Fujitsu Technology, France: Sept 2023 – Sept 2024

- Website backend management, data flow optimization, code optimization and bug correction.
- Search for efficient algorithms for parallel processing of tasks and writing of documentation.

Concepts: JavaScript, Angular, PostgreSQL, Parallel Programming, Distributed Systems, AWS.

Research Scientist | Internship | Part-Time | Applied Artificial Intelligence Lab, France: Sept 2022 – Aug 2023

- Development of multi-modal system for scientific document understanding.
- Design of CNN architectures for diagram extraction and Transformer models for text representation.

PROJECTS

Instruction-Following Multimodal Agent with Vision-Language-Action Reasoning | Jan 2025 – May 2025

- Built a multimodal agent combining text, vision, and reasoning for instruction following.
- Fused CLIP visual embeddings with open-source LLM (LLaMA) via cross-attention.
- Implemented an "Observation → Reasoning → Action" loop using LangChain.

Concepts: Python, PyTorch, C++, CUDA, LangChain, Transformers, Multimodal Learning.

3D Scene Reconstruction and Estimation using Implicit Neural Representation | Dec 2023 – Apr 2024

- Dense 3D reconstruction from monocular video using implicit NeRF representations.
- Self-supervised depth and camera pose estimation with photometric consistency.

Concepts: Python, Pytorch, PyTorch3D, OpenCV, Open3D, C++, CUDA, NeRF, Differentiable Rendering.

Unsupervised Morphological and Syntactic structure Induction via VAE | Nov 2022 – Mar 2023

- Unsupervised learning of linguistic morphology and syntax using a sequence-to-sequence VAE.
- Optimised ELBO to analyse latent representations and linguistic correlations.

Concepts: Python, Pytorch, SpaCy, NLTK, C++, CUDA, Bayesian Inference, Statistical Linguistic.

TECHNOLOGIES AND LANGUAGES

- C++, OpenMP, Boost, Python, PyTorch, TensorFlow, Keras, OpenCV, LLM, VLM, CUDA, Linux, Git, SQL.

Here is a list of the courses I have taken or am currently taking:

MSc Computer Science, Artificial Intelligence -----Sept 2025 – Sept 2026

Paris-Saclay University, France, *First French Research University in Mathematics and Artificial Intelligence*

- Image Mining and Computer Vision
- Deep Learning for Natural Language Processing
- Automated Speech Recognition and Natural Language Processing
- Text Mining and Chatbot
- Learning Theory and Advanced Machine Learning
- Scientific Machine Learning and Reinforcement Learning
- Probabilistic Generative Models and Signal Processing
- Advanced Optimization and Automated Machine Learning

MSc Computer Science, Mathematics, Vision Learning -----Sept 2024 – Sept 2025

ENS Paris-Saclay, France, *First French Research University in Mathematics*

- Statistical learning and Bayesian Machine Learning
- Probabilistic Graphical Models and Deep Generative Models
- Convex Optimization and Applications in Machine Learning
- Large Language Models, and Chatbot
- Algorithms for Speech and Natural Language Processing
- Deep Learning for Image Restoration and Synthesis
- Deep Learning and Signal Processing
- Object Recognition and Computer Vision

MSc Computer Science, Mathematics -----Sept 2023 – Sept 2024

ESIEE Institute of Technology, France

- Advanced Calculus and Linear Algebra
- Probability and Statistics
- Discrete Markov Chains
- Stochastic Calculus
- Computer Vision and Image Processing
- Advanced Machine Learning
- Advanced Deep Learning and Natural Language Processing

BSc Computer Science, Mathematics ----- Sept 2017 – Sept 2019

Sup'Management Engineering, Gabon, *First Gabonese Research University in Mathematics*

- Linear algebra and calculus
- Probability and Statistics
- Advanced Python and Advanced C++
- Graph Theory
- Algorithms and Data Structures
